Notes about this instrument:

- This annotated instrument is designed to provide question content, variable names, labels and response values. It does NOT represent the actual survey completed by respondents because skip patterns and other programming for web-based administration are not presented. For a full list of variables included in each dataset, as well as missing data codes, please reference the codebook. Screen shots of the surveys as administered are available upon request at: email ncfelashe@mail.nih.gov

- The variable information in all capitals is the VARIABLE NAME. Following the variable name is the VARIABLE LABEL.

- Survey instrument is indicated by the starting letters of the variable name:
  
  - T = Teen Demographic survey
  - TD = Teen Diet survey
  - TP = Teen Physical Activity Survey
  - P = Parent Demographic Survey
  - PD = Parent Diet Survey
  - PP = Parent Physical Activity Survey

- Some variables were constructed to facilitate data analyses. These variables are indicated by variable names beginning with “X.” Some of these X variables can be found in this instrument and others can be found in the codebook.

- Federal Laws govern the protection of individual respondents participating in federally-sponsored studies and surveys. In order to ensure that FLASHE was in compliance with these regulations, a risk assessment study was conducted. Data that was determined to pose too great a risk of exposure for personal identifiable information to respondents were modified to ensure confidentiality. The types of changes made included:
  
  - Recoding some responses to combine response categories due to small cell sizes. Variable names that include “RC” have been recoded.
  - Removing some data from the public use dataset. These data are indicated with the statement “Information not available on the public use dataset”.
