TOBACCO USE SUPPLEMENT
CURRENT POPULATION SURVEY

2001-02 ENGLISH VERSION
TOBACCO USE SUPPLEMENT
TO THE CURRENT POPULATION SURVEY
(TUS-CPS)
Revised 2004

A downloadable version of this document, the 2001-2002 English Tobacco Use Supplement to the Current Population Survey (TUS-CPS) may be obtained from http://riskfactor.cancer.gov/studies/tus-cps/info.html. It was fielded in June and November of 2001 and February of 2002 by the Census Bureau for the co-sponsors the National Cancer Institute and the Centers for Disease Control and Prevention as part of a continuing series of Tobacco Use Supplements to the Current Population Survey.
2001-2002 CPS

TOBACCO USE SUPPLEMENT

ITEMS BOOKLET (with skip pattern)

Public reporting burden for this collection of information is estimated to average .1169 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: NIH Project Clearance Branch, 6705 Rockledge Drive, MSC 7974, Bethesda, MD 20892-7974, ATTN: PRA (0925-0368). Do not return the completed form to this address.
This month we are asking some additional questions concerning the use of tobacco products. I need to ask each individual, age 15 years old and older, these questions.

In what language was the interview for this person conducted?
Skip patterns were changed in the 2001-2002 instrument so that both “everyday” and “someday” smokers will be asked questions assessing 24 hour quit attempts (Q44-46A). Previously only everyday smokers were asked these questions. This change from the September 1998 version of the survey is being considered so that the data collected will be consistent with the Department of Health and Human Services (DHHS) Healthy People 2010 objectives.

This statement has been added to the 2001-2002 instrument in order to clarify the transition from questions regarding cigarettes to questions about other tobacco use.

The words “EVEN ONE TIME” have been added to this question to clarify what “EVER” means. Pipes and cigars were changed to the singular tense accordingly, similar to the NHIS 2000 Cancer Control Module questions.

A question assigned to the September 1998 version of the questionnaire regarding free sample distribution of tobacco companies has been removed from the 2001-2002 version because currently a wide variety of types free samples (including nontobacco products) may be distributed and the information captured would be unclear.
