New Developments in the Tobacco Use Supplement to the Current Population Survey (TUS-CPS)

Introduction

Gordon Willis, PhD
Applied Research Program
Division of Cancer Control and Population Sciences
National Cancer Institute, NIH

September 17, 2013
The TUS-CPS is a rich resource for tobacco surveillance and research
  - Large sample allows good precision, sub-national estimation
  - Good population representation, response rate
  - Tracking of trends, but also inclusion of new trends

Available to extramural research community

But... challenges to use include:
  - Communicating new TUS-CPS developments (linkages to other data, creative uses)
  - Making data easily analyzable

Webinar objective is to address these issues
Webinar agenda and ground rules

Four speakers (first 80 minutes):

Anne Hartman, NCI:

*TUS-CPS Linkages and Unique Aspects*

Sean Altekruse, NCI:

*TUS-CPS and the National Longitudinal Mortality Study (NLMS) Outcome Data*

Benmei Liu, NCI:

*Statistical Practices on Best Practices for Analysis*

Todd Gibson, IMS

*Tips and Tricks of Handling TUS-CPS Data*
During the presentations

- The Webinar will be *audio recorded*
- Listeners will be put on *mute*
- Listeners can ask questions in *CHAT area* to right of the screen
- In your question, indicate *which speaker* you are addressing
- NCI staff will collect questions for the Discussion ->
Webinar agenda and ground rules

Discussion (40 minutes):

1. NCI staff will address questions to speakers, in turn
2. Speaker will answer question
3. Question asker will be invited to (briefly) comment/follow-up
4. Staff will use discretion to ensure that all four presentations are discussed
5. With five minutes to go, we will wrap up
