NETWORKING

Participants wanted more ways to meet with like-minded policy-focused researchers and identify collaborations.

Key steps for the upcoming year:

- Implement quarterly working group meetings
  - Next meeting December 5, 2023 at 12p ET over Zoom
  - Email ccis@icf.com to get on policy listserv
- Meet and greet at D&I

MODELS TO MEASURES

Participants were interested in thinking more deeply about how to link IS theories, models, and frameworks to policy measures.

Next steps:

- Discuss Allen et al., 2020 review paper at working group meeting
- Review high quality measures and links to IS TMF's
- Create brief report with concrete examples of measures for different constructs
- Future: repository of high-quality measures

Division of Cancer Control & Population Sciences

POLICY-AS-STRATEGY LEARNING

We discussed various ways to conceptualize policy in implementation science. One of particular interest was using policy as a strategy to implement EBP's.

Next steps:

- Dedicate working group quarterly meetings to case studies and discussion
- Consider 1-2 case study reports on uses of policy as a strategy and/or recordings of presentations
