

C3I Data Report 2

July 1, 2018 to December 31, 2018.

Instructions:

This document is to be used as a worksheet for completing the data request. All data should be reported in the online Qualtrics survey. The first column in each worksheet indicates the number of the corresponding question in the online survey.

Please provide data for the reporting period from July 1, 2018 to December 31, 2018.

Complete the Reach and Effectiveness tabs (3 total). There are specific instructions on each tab.

You may not have data to report for every field. Please enter NA for the fields that you do not have data to report (e.g. question/category was not asked). Please enter 0 if there are no patients in that category.

You may have separate data for different health care settings (for example, if the reports are generated from different health care organizations or EHR systems). The online survey has space to enter up to 3 settings.

Optional items are flagged with blue font: Optional.

Please contact Heather D'Angelo with any questions

Instructions for reporting on Reach:

Please provide data for the reporting period from July 1, 2018 to December 31, 2018

Enter the number of unique patients, not the number of visits. As a reminder, you should report on all patients seen in the setting indicated. This includes patients diagnosed with cancer as well as other types of patients (e.g. screening patients).

You may have separate data for different health care settings (for example, if the reports are generated from different health care organizations or EHR systems). There is space to list them under the headings Setting 1 and Setting 2. Enter the name or description of each setting under Item 2.

This document is to be used as a worksheet for completing the data request. All data should be reported in the online Qualtrics survey. The first column in each worksheet indicates the number of the corresponding question in the online survey.

Instructions for reporting on Effectiveness Part 1:

Please provide data for the reporting period from July 1, 2018 to Dec 31, 2018.

Report each effectiveness measure among smokers who have engaged/participated in a tobacco treatment program (TTP). Engagement is defined as completing at least 1 session of a TTP, or the equivalent of a session (e.g. calling a quitline). Please refer to the Data Reporting Protocol for details.

Enter data at baseline/time of enrollment and at 6 months follow-up. The same patients will not be reported in the enrollment and follow up categories within the same report.

You may have separate data for different health care settings (for example, if the reports are generated from different health care organizations or EHR systems). There is space to list them under the Setting 1 and Setting 2 columns.

You may not have data to report for every field. Please enter NA for the fields that you do not have data to report. Please enter 0 if there are no patients in that category.
