

C3I Data Report January to June 2021 pre-populated

Start of Block: Cancer Center Information

Q1.1 This questionnaire will collect information from all C3I grantees for the period of **January 1 through June 30, 2021.**

The completed questionnaire, including the completed Excel Data Report Worksheet, is due August 6, 2021.

Please answer all questions about your Cancer Center setting(s) and Tobacco Treatment Program (TTP) and cessation services for this reporting period, **January 1-June 30, 2021.**

Program characteristics and activities. In an effort to reduce survey burden, with some exceptions, the sections of this survey about your program characteristics and activities have been pre-populated with your responses from your site's previous report. For each question in that has been pre-populated, you will be asked to confirm that you have reviewed and made any needed changes so your responses reflect program characteristics and activities for the current reporting period.

Reach and effectiveness reporting. Please work from the Data Report Worksheet to enter the reach and effectiveness data into this online survey, and refer to the Reporting Protocol. A pdf of the full survey, the Data Report Worksheet, and the Data Reporting Protocol are all posted on the C3I portal (<https://ncihub.org/groups/c3i>). You will be asked to upload the completed Data Report Worksheet at the end of the survey.

TO STOP AND CONTINUE THE SURVEY LATER WITHOUT LOSING YOUR RESPONSES:

Use your center's unique link sent to you via email. Click the arrow at the bottom of each page on which you have entered data. Use the same browser and computer each time you access the survey. Do not view the survey in "incognito mode". Do not clear your cache until you have fully submitted the survey. If you have trouble continuing the survey, please email me at [sdhohl \(at\) wisc.edu](mailto:sdhohl@wisc.edu).

Q2.0 In an effort to reduce survey burden, the sections of this survey about your program characteristics and activities have been pre-populated with your responses from the previous reporting period, if that question was answered in that report.

For each question, you will be asked to confirm that you have reviewed and made any needed changes so your responses reflect program characteristics and activities for the current reporting period.

Q2.1 How often is smoking status updated/recorded in the EHR?

- ☐ At new patient visits only (1)
- ☐ More frequently than new patient visits, but not at every visit (2)
- ☐ At every patient visit (3)
- ☐ Other (please describe): (4)

- ☐ Don't know/Not sure (9)

Q2.1.0 Please confirm that you have reviewed and made any needed changes to Q2.1 above.

- ☐ Yes. I have reviewed the data and made changes, if needed. My responses reflect our activities for the current reporting period. (1)

Q2.2 How often is the use of electronic cigarettes/electronic nicotine delivery systems (ENDS; including any type of “vaping” device such as JUUL) updated/recorded in the EHR?

- ☐ E-cigarette/ENDS use is not assessed in the EHR (0)
 - ☐ Recorded at new patient visits only (1)

Q2.13 The next set of questions assess sustainability of your tobacco treatment program. This assessment has been designed for use with a wide variety of practices across different clinical settings. Given this flexibility, it is important for you to think through how you are defining your practice and organization before starting the assessment.

Below are a few definitions of terms that are frequently used throughout the assessment. Take a moment to define them for your situation. Keep in mind that this tool is designed to assess your specific practice within the context of its organization and community, and not the organization as a whole. **Practice** refers to the set of formal organized activities that you want to sustain over time. Such activities could occur in a variety of clinical settings. **In C3I, the practice would be defined as the set of formal, organized activities within your tobacco treatment program that you want to sustain over time.** **Organization** encompasses all the parent organizations or agencies in which the practice is housed. Depending on the practice, the organization may refer to a health center, a hospital, etc. **Community** refers to the stakeholders who may benefit from or who may guide the practice. This could include clinical staff, leadership, care recipients and their families, etc. Community does not refer to a specific town or neighborhood. In the following questions, you will rate your practice across a range of specific factors that affect sustainability. Please respond to as many items as possible. If you truly feel you are not able to answer an item, you may select “Not able to answer.” **To mitigate response bias, this section has not been pre-populated from the previous survey.**

Q5.6 REACH DATA REPORT Please provide data for the reporting period from January 1, 2021 to June 30, 2021. Enter the number of unique patients, not the number of visits. As a reminder, you should report on all patients seen in the setting indicated. This includes patients diagnosed with cancer as well as other types of patients (e.g. screening patients). You may have separate data for different health care settings (for example, if the reports are generated from different health care organizations or EHR systems). There is space to enter data for up to 3 settings. You may not have data to report for every field. Please enter NA for the fields that you do not have data to report. **Please be sure to distinguish between 0 (zero) patients and missing or not applicable/NA data.**
